2019 has been designated by UNESCO as the International Year of the Periodic Table (IYPT), marking the 150th anniversary of the Mendeleev periodic table, which is an iconic image and a vital tool to all who learn and work in science, at all stages of their learning and careers. IYPT allows us to celebrate our profession, our members and our communities. We want to work with our communities to engage people with both the periodic table and the Chemistry.

Our management had decided to celebrate the “Vivekananda Saptah” from 12th January to 19th January every year in devotee the name of great monk. The reason of that are to inculcate the spiritual thoughts of Swami Vivekananda among the students.

Chemistry department have planned lots of exciting and diverse activities like Elemental Exhibition, Magic Chemistry, Experimental/Instrumental Demonstrations and Bibliography of Scientists for celebrating the IYPT in Vivekananda Saptah as a CHEMISTRY CARNIVAL on date 18th January 2020 from 10:00 am to 05:00 pm at college campus. IYPT is an opportunity for us to develop new resources and raise awareness, to inspire people of all ages, experience and backgrounds.

Head, Department of Chemistry

In experimental/instrumental demonstrations, we setup the school level (8th to 12th std) syllabus based experiments and invites eleven schools for such exhibition. In a school due to the lack of chemicals and materials they do not clearly understand the science behind the experiment practically. This weakness of the school is keep in mind, then we decided to organize the *CHEMISTRY CARNIVAL* for school students.. We allotted the experiments/instruments to the students of M. Sc. II (Organic Chemistry) they actively prepare their experiments and demonstrates very nicely. They also prepared some charts for understanding of reactions. All school students has good enthusiasm about the experimental demonstrations and also participate the practical experience of experiment. The main purpose of this programme is to enhance the science awareness in school level students.

WOMEN EMPOWERMENT CELL

REPORT ON

Training Course in Self Defense

Event	Training Course in Self Defense
Date	15th January to 24th January 2020
Duration	10 Days
Time	08.00 to 10.30 am
Venue	Room No 43
Total Participants	Female: 71

Walking home alone and feeling uneasy? Getting a weird vibe from a stranger on the bus? Many of us have been there.

Girl students of the college reported experiencing some form of sexual harassment, verbal harassment was the most common form, but some women said they were touched or groped in an unwelcome way, while some of women survived sexual assault in the society now a days.

Even if you've personally never felt yourself in a situation that made you feel physically unsafe, having reassurance about your next steps (and what you can do to help yourself should the unfortunate circumstance ever happen) can make all the difference.

Self-defense helps women protect themselves and their family. In my opinion, this is the most important reason for women to learn self-defense, because it is the difference between life and death. ...

In a self-defense situation, this is pivotal. The majority of attackers are not going to be proficient in martial arts.

The Women empowerment Cell of the College organized a programme of Training Course in Self Defense 15th January to 24th January 2020 at 08.00 to 10.30 am. Everyday.

Trainers	Shri. Udaykumar Patil
	Manoj Kandkar
	Ashwini Koli
	Tejaswi Patil
Organizer	Women Empowerment Cell

In collaboration with Women Warrior Thang- Ta Club, Sangli, their team members Shri. Udaykumar Patil, Manoj Kandkar, Ashwini Koli and Tejaswi Patil have given a training of karate, punches as well as basic techniques required for self defense. Girls warm up the body in the beginning and then practice each puch and trick which they learnt yesterday.

1. Focus on your attacker's vulnerable places: eyes, nose, throat, and groin. Aim all of the moves below at one or several of these areas to have maximum impact.
2. Don't aim for the chest, as that tends to be ineffective. Aiming for the knees requires a specific kick that can be too risky for the average person.
3. Use all of your force and aggression during execution. Make it known that you're a powerful lady. Use your voice, too. Be loud to intimidate the attacker and create attention in case somebody is nearby.

1. Hammer strike:

Using your car keys is one of the easiest ways to defend yourself. Don't use your fingernails, because you're more at risk to injure your hands.

Instead, if you feel unsafe while walking at night, have your keys stick out from one side of your fist for hammer strikes.

Alternative: If your attacker is too close, thrust your knee toward the groin. Make sure you're stabilized and not at risk of falling over.

2. Heel palm strike:

This move can cause damage to the nose or throat. To execute, get in front of your attacker as much as is possible.

Alternative: An open palm to the ears can be very disorienting.

3. Elbow strike:

If your attacker is in close range and you're unable to get enough momentum to throw a strong punch or kick, use your elbows.

4. Alternative elbow strikes:

Depending on how you're standing when you're initially attacked, you may be in a better position for variations on the elbow strike.

5. Escape from a 'bear hug attack':

For cases where the attacker is coming from behind, you'll want to use this move. Focus on getting low and creating space to free yourself.

6. Escape with hands trapped:

If your attacker comes from behind and traps your arms (this is similar to a bear hug, but you won't be able to move as freely), here's what to do:

7. Escape from side headlock:

When the attacker locks their arm around your head from the side, your first instinct should be to avoid getting choked.

However, if you don't feel confident you're able to physically handle an attacker, take these precautions.

8. Meditation:

Meditation is relaxation. It is not about concentration, it's actually about de-concentration. It's not about focussing one's thoughts on something specific, but instead of entering a state of mind that has no thoughts. The overall benefits of meditations include a calm mind, improved clarity and communication, and relaxation of the mind and body. Regular practice of meditation has a profound impact on the core three areas of our existence - physical, mental, and spiritual.

Benefits of meditation....

- Reduces Stress. Stress reduction is one of the most common reasons people try meditation. ...
- Controls Anxiety. ...
- Promotes Emotional Health. ...
- Enhances Self-Awareness. ...
- Lengthens Attention Span. ...

- May Reduce Age-Related Memory Loss. ...
- Can Generate Kindness. ...
- May Help Fight Addictions.

Principal Dr. Milind Hujare and Prof. Dr. Suresh Patil Visited the course, while students are engaged in meditation.

Safety tips.....

1. **Stay in a well-lit public area.** Don't go home or turn away from crowds. Walk into a store or a coffee shop and ask for help.
2. **Call the police.** Find a well-lit public area and dial 911 or your local emergency services if you feel you're in danger.
3. **Carry protection.** Whether pepper spray, a personal safety alarm, or a lipstick taser, self-defense tools can help you feel more at ease.

If you're carrying self-defense tools, make sure to get training on how to use them.

You can also use more common objects as weapons, including a purse, briefcase, umbrella, phone, pencil, book, or rock.

Anything blunt that can be used to hit, throw, stab, or swing can be very effective.

Principal's
opinion

Student's
feedback

The students appreciated the course too much.....

The girl students found that, who participated in a self-defense class they felt:

- had better safety strategies in place
- were more equipped to deal with strangers, and people they know, in the context of potential assault or abuse
- had more positive feelings about their bodies, had increased self-confidence

Horticulture is the science and art of the development, sustainable production, marketing and use of high-value, intensively cultivated food and ornamental plants.

Horticultural crops are diverse, including:

- Annual and perennial species,
- Fruits and vegetables,
- Decorative indoor plants and
- Landscape plants.

Horticulture also contributes to quality of life, and the beauty, sustainability and rehabilitation of our environment and the human condition.

Horticulture involves plant propagation and cultivation to improve plant growth, yields, quality, nutritional value, and resistance to insects, diseases, and environmental stresses. It also includes plant conservation, landscape restoration, soil management, landscape and garden design, construction and maintenance, and arboriculture. The word *horticulture* is modeled after agriculture; it derives from the Latin words *hortus* and *cultura*, which mean “garden” and “cultivation”, respectively. In contrast to agriculture, horticulture does not include large-scale crop production or animal husbandry. Additionally, horticulture focuses on the use of small plots with a wide variety of mixed crops while agriculture focuses on one large primary crop at a time.

Experts of the seed farm Shri. Pradeep Mali, Sachin Kadam and Shri. Gajanan Kamble had actually trained the students in the techniques of horticulture.

1. Horticultural equipment and its uses.
2. Selection of stock and scion for the horticulture techniques.

3. Types of grafting: Whip Grafting, Tongue Grafting and its benefits for fruit plants like Mango, Sapota (Chiku) and Guava fruits.
4. Budding and its types: T Budding and Patch budding.
5. Layering and its types: Simple layering and Air layering.
6. Hardening of that plants, its duration.
7. Plantation and transplantation

Our Department organized ‘Historical Exhibition on wooden art, old Manuscripts and Coins’ on 25th January 2019. An exhibition, in the most general sense, is an organised presentation and display of a selection of items. In practice, exhibitions usually occur within a cultural or educational setting such as a museum, art gallery, park, library, exhibition hall. Exhibitions can include many things such as art in major museums and smaller galleries, interpretive exhibitions, natural history museums and history museums, and also varieties such as more commercially focused exhibitions and trade fairs.

Exhibit Objectives:

- To foster a better understanding of the importance of historical artefacts in our live.
- To provide an overview of collecting methods and rationales and help visitors better understand the role of history museums in preserving the past.
- To help visitors learn from historical artefacts and inspire them to learn more about the process.
- To entertain and amuse visitors with the variety and scope of the museum's collection.
