बदलत्या वातावरणाचा अभ्यास करून रासायनिक खतांच्या वापराला निबंध घातला पाहिजे. सॅद्रिय पद्धतीने शेती केली पाहिजे. त्यासाठी प्रत्येक शेतकऱ्याने स्वतः गांडूळ खत निर्माण करावे, असे प्रतिपादन प्राचार्य डॉ. मिलिंद हुजरे यांनी केले.

ते तासगाव येथील पद्मभूषण डॉ. वसंतरावदादा पाटील महाविद्यालयातील प्राणीशास्त्र विभागाने सुरू केलेल्या गांडूळखत प्रकल्पाच्या उद्घाटनप्रसंगी बोलत होते.

डॉ. हुजरे म्हणाले, प्राणी शास्त्र विभागाने सुरू केलेला हा एक स्तुत्य उपक्रम आहे. महाविद्यालयाच्या परिसरातील झाडांची पाने व कचरा

Smart classrooms are the amalgamation of technology used at the teachers desk and in front of the classroom, technology in the hands of the student and a physical environment that allows the successful use of that technology. There is solid research supporting modest academic gains from the use of technology in the classrooms. In addition to academic improvement, there is the opportunity to engage the student more fully, expose them to technology used in the workplace and get immediate feedback of classroom knowledge.

Change is needed in the classroom environment to successfully work with technology. For example, laptops and old school desks are not designed to work well with each other. Solutions can either be new desks that better accommodate laptops or use tables. In addition to changing the classroom, other critical factors for success are a working device for each student along with training and support for teachers.

**Introduction of Chief Guest by  
Prof. (Dr.) Suresh S. Patil  
Co-Ordinator, IQAC, PDVP College Tasgaon**

We were invited to a guided and trained by Mr. Pravinkumar Patil, Director, Bharat Automation (OPC), Pvt. Ltd. Pune. Prof. (Dr.) Suresh S. Patil, Organising Secretary of the programme introduced the invited chief guest Mr. Pravinkumar Patil. During a training programme of the facility the interesting part was how technology usage represented itself. Today when people think of technology as part of smart classrooms the focus is around computers, laptops, smartboards, and electronic ways to connect and display learning material. Instead, what was seen was a mixture of technology represented through more social sciences around flexible seating and smarter workspaces. It stands to reason that technology without effective teachers, appropriate content and methods, and students willing to learn will be ineffective. The smart classroom is not a silver bullet, but another tool we can use to increase the chances of success. Prof. Prabhakar V. Patil has concluded the programme by giving vote of thanks.

**Mr. Pravinkumar Patil,**

**Director, Bharat Automation (OPC), Pvt. Ltd. Pune**

**Demonstration of Smart Interactive Board by  
Mr. Pravinkumar Patil,  
Director, Bharat Automation (OPC), Pvt. Ltd. Pune**

**Objectives Digital Classroom:**

- To create advancement in education system.
- To make learning and understanding.
- Students learn their lessons in a smart approach
- Helps to keep track of students.
- To encourage informal learning.
- Learning best takes place in spaces that can easily morph based on teaching approaches and learning preferences.
- There's a new generation of students with different experiences and expectations than those of their parents.”
- To improve active learning environments, concentration, focus and facilitate group engagement.
- Every seat can and should be the best seat in the room.
- The classroom needs to support instructors moving among teams to provide real-time feedback, assessment, direction and to support students to peer to peer learning.

Adding smart boards, laptops, tablets, and other similar devices in a classroom do not define a smart classroom. These modern tools are part of the classroom, that when leveraged effectively can factor into greater learning outcomes for all students. The learner's engagement is the product of the whole classroom environment which encompasses infrastructure, methodologies, hardware, and software. These aspects working in concert create an optimal learning environment considered the smart classroom. A smart classroom involves all learning stakeholders and the learning ecosystem, and how they interact collaboratively in physical and virtual space. This model emphasizes the teacher guiding the student in an evolving journey rather than standing in front delivering messages in a linear one-way fashion.

Intellectual Property Rights (IPRs) are a set of exclusive rights protected by law which are accorded to creators or persons over their creations for a certain time period. An IPR holder can realize value from its intellectual assets through utilizing it internally for its own processes or share it externally through provision of goods and services to customers. The latter can be achieved through legal mechanisms such as licensing or assignment.

In today's globally competitive environment, intellectual property has placed itself on a pedestal in the context of economic growth and is becoming increasingly important. Intellectual Property (IP) is the fuel that powers the engine of prosperity, fostering invention and innovation. The increasing significance of intangible assets in the global economy is forcing business organizations to actively manage their IP as a key driver for building and sustaining their competitive advantage and achieving superior performance.

IPRs are now being used not only as a tool to protect creativity and generate revenue but also to build strategic alliances for socio-economic and technological growth. Accordingly, in order to foster the protection of innovations and creativity, the Intellectual Property Office under the Ministry of Commerce and Industry is dedicated to mobilize the use of such technological advancement for the economic development of the country.

The generation of IP largely takes place at the State level through small,

medium and big industries, academic institutions and individuals. Most States have not yet evolved their IP strategies and ecosystems in terms of effective facilitating services for all sectors including MSMEs and start-ups, creating awareness, conducting training programs, systems for utilization of IPR etc. States need to maximize the benefits from their intellectual property by stimulating higher levels of innovation through a judicious system of rewards, ensuring timely and effective legal protection for IP and leveraging strategic alliances for enhancing the value of the intellectual property created in the State.

Taking into consideration the importance of IPR, Internal Quality Assurance Cell of college organized one day workshop on Intellectual Property and Patenting System in India for to aware students and faculty members about IPR on 24<sup>th</sup> January 2020.

The workshop was intended to spread the awareness of intellectual property rights among the students and faculty. Eminent resource person in the field of IPR were invited to enlighten on the subject.

## Introduction: The Climate Reality Project:

In 2006, The Climate Reality Project Chairman and former U. S. Vice President Al Gore sparked an international conversation on climate change with his Academy Award –winning documentary, An inconvenient Truth. It was just the beginning of a climate revolution and a year later he founded The Climate Reality Project. At The Climate Reality Project, our mission is to catalyze a global solution to the climate by making the urgent action a necessity across every level of society.

The Climate Reality Project has branches in 10 countries. The Climate Reality Leadership Corps has been training and empowering everyday people to become world changers and then mobilizing them for action. Currently, more than 20.000 diverse and dedicated volunteers internationally called Climate Reality Leaders from over 150 countries have been trained. Every year, Climate Reality organizes 24 hours of Reality and reaches millions of households and individuals in one day, via television, online media, and personal communication to raise awareness and lead global climate conversation.

Keeping in view this fact the Two Days National Conference was arranged which will increase the knowledge of the participants regarding parallel scientific words of English and Marathi.

**Outcome for Participants** – The conference was benefited to the participants with respect to the parallel words of science both in English and Marathi. The participants were getting knowledge of Marathi words used for English words in botany, zoology and biology. The participants were all teachers. So that indirectly this conference was benefited to the students because during teaching proper Marathi words will be used by the teachers for scientific words and that's why students will get scientific terms easily.
