The hemoglobin test is often used to check for anemia, usually along with a hematocrit or as part of a complete blood count (CBC). The test may be used to screen for, diagnose, or monitor a number of conditions and diseases that affect red blood cells (RBCs) and/or the amount of hemoglobin in blood.

The importance of hemoglobin taking into consideration our department has decided to organise the hemoglobin check-up camp for college stakeholders especially girl students.

Dr. Shital Patil said that haemoglobin should be good for health of the body. A balanced diet is essential for good health. In the current fast-food era, girls should eat a healthy and iron-rich diet and get enough sleep to stay healthy.
