Forests are needed to maintain the balance of the environment. Although deforestation has not been possible in recent times, it can be maintained by planting a large number of trees. It is possible to overcome the drought. The state government has decided to plant 1 crore trees this year . Man is born of nature. Human beings were born , grew and merged from this very nature .

Human beings began to get many things from this nature. So his life became very easy. Also trees are an important component of the environment. Trees are very important in human life. Forests and forests are a treasure trove of natural beauty. Since ancient times the forest has been providing for many human needs. Trees provide human beings with fruits, flowers, food, herbs and fuel. They also provide wood for building houses. The biggest thing is that trees provide clean air

to all animals, birds and human beings. Arms and human beings and all living tree with pure oxygen itself harmful carbon dioxide absorbed pollution by providing, preventing it from soil erosion. Trees help to keep the balance of the environment clean.

Our country India had immense wealth a hundred years ago. But today, a few years ago, due to industrialization and urbanization, the number of trees is declining. Deforestation is causing deforestation. Also the land is deteriorating.

All this to stop you at all - there is a need to mobilize more trees. There is no point in just planting trees, they should be saved and taken care of.
