### **Why this Training is important.....**

Beautiful things change the one's emotion in a very positive way, they just act as mood changing catalyst in the mind of person. Beauty of a person gives a feeling of magnificent happiness. Beauty is a unique expression of any person which reflects the personality of the person in the true manner. In today's era, we all want to look beautiful as well as like to get attention by somebody else also. However, beauty is just like the garden which must be maintained and should be take care from time to time by the beauty professionals. Therefore, why we should hesitate or feel shy for making our appearance beautiful and confident.

Beauty is a joy forever, and skin is the biggest contributor to beauty. The feminine beauty ideal is "the socially constructed notion that physical attractiveness is one of women's most important assets, and something all women should strive to achieve and maintain".

The feminine beauty ideal, which also includes female body shape, varies from culture to culture. Pressure to conform to a certain definition of "beautiful" can have psychological effects, such as depression, eating disorders, and low self-esteem, starting from an adolescent age and continuing into adulthood.
